organic solutions for all your growing needs

Fertilizers that work for you

TALBORNE VITA ORGANIC FERTILIZERS

(Reg Group 1 Fertilizers NDA SA)

Approved input for Certified Organic by Control Union EU & NOP USDA

Scientifically formulated complete fertilizers which deliver high feeds of N, P, K (Group 1), minor, micro nutrients and carbon for productivity and quality. Low humus content. Organic nutrients are slowly released. Organic materials originate from animal and plant sources and natural mineral deposits.

- Vita Grow® 2:3:2 (16)
- Vita Fruit & Flower® 3:1:5 (18)
- Vita Green® 5:1:5 (16)
- Vita Veg® 6:3:4 (16)
- Vita Nitro Boost® 8:1:1 (10)
- Vita Bone Phosphate 4:10:0 (14)

TALBORNE ECO ORGANIC FERTILIZER

(Reg Group 2 Fertilizers NDA SA)

Approved input for Certified Organic by Control Union EU & NOP USDA

ECO-logical, ECO-nomical fertilizer formulated mix of compost enriched with Vita Organic Fertilizer, particularly suitable for extensive production for soil which needs a generous supply of nutrients and humus. Organic materials originate from animal and plant sources and natural mineral deposits.

- Eco-Green Seedling Food 6:2:5 (13)

TALBORNE ENVIRO CARE FERTILIZER

(Reg Group 1 Fertilizers NDA SA)

NOT Approved for Certified Organic

'Best of Both' organic high nutrient blend fertilizer enriched with selected chemical fertilizers for biological farmers & projects which require a fast initial boost of water soluble N:P:K, followed by a sustained release of organic N:P:K, minor- and micro-nutrients in a carbon base, while caring for a sustainable, productive environment.

- 2:3:2 (21)
- 2:3:4 (23)

- 5:1:5 (22)
- 6:3:4 (22)
- 8:1:1 (20)
- 3:2:1 (24)
- 7:1:4 (22)

TALBORNE NATURAL TURF FERTILIZER

(Reg Group 1 Fertilizers NDA SA)

NOT Approved for Certified Organic

Formulated blends of natural, organic and chemical fertilizers for specialised sustained feed suitable for professional turf maintenance. Long-term high value feeds. Reduced loss through leaching. Gentle alternative for the environment.

- Greens Grade + 50% Gypsum 25 kg 12:1:2 (15)

TALBORNE GREEN & ORGANIC WEED CONTROL

Approved input for Certified Organic by Control Union for NOP USDA

Non-toxic, bio-degradable, non-selective weed control solutions made from plant acid extracts and natural ferments. This foliar spray destroys the inner cell structure of the leaf which results in the disruption of photosynthesis and an almost immediate collapse of the leaf. There is no known systemic action, so regrowth from roots or bulb on aggressive weeds requires follow up treatment. Active ingredients: natural plant acids.

- Soft broad leaf
- Tough & strong leaf
- Seed stop

TALBORNE TECHNICAL SERVICES, SUPPORT & TRAINING

Through our national network of qualified and experienced advisors we offer the following services, rates quoted per project:

- **Technical Services** – soil analysis, remedial recommendations, fertilizer applications, crop advice, pest & disease control
- **Support, Advisory & Services** – organic farming methods, preparation for organic certification, on-site evaluations and support, value added processing, green & organic marketing, branding, product development, sales & distribution services on selected products only.
- **Training Courses** – organic farming, emerging farmers, young farmers & women farmer development projects, basics of organic production for new projects, optimal fertilizer use, basics of organic pest & disease control on crops, custom designed courses, green landscaping, organic gardening short courses.

Use Talborne Organic Fertilizers because:

COST SAVING – VALUE FOR MONEY

- ✓ High N:P:K organic fertilizer content
- ✓ Contains ALL minor- & micro-nutrients, proven essential for plants
- ✓ Microbial activators of soils
- ✓ Carbon content minimum of 25% plus
- ✓ Minimal loss of nutrients through leeching or volatilisation
- ✓ Sustained release over 4+ months
- ✓ Reduced applications thus cost savings
- ✓ Reduces soil compaction

SUSTAINABLE – NON-POLLUTING

- ✓ No negatives - no pH change, no build-up of salts, no chlorine to damage soil
- ✓ No carrier salts or non-nutritive filler - doesn't burn plants and helps conserve water
- ✓ Nutrients from natural sources - optimised uptake by plants
- ✓ Non-polluting of soil, water or air
- ✓ Sustainable organic production
- ✓ Based on principle of nutrient recycling

SAFETY ASSURANCE – NO TOXIC RESIDUES

- ✓ Complies with Approved Inputs for Control Union EU & USDA NOP Organic Certified Standards
- ✓ GlobalGAP compliant
- ✓ Well below allowed MRL of heavy metal pollutants
- ✓ Registered fertilizer with NDA SA

Jane's Delicious Garden

FEATURES

- ✓ Approved Input for Certified Organic EU & NOP by Control Union
- ✓ Complete fertilizer, with high N:P:K, minor- & micro- nutrients
- ✓ Sustained Release Fertilizer (SR) for long-term feed
- ✓ Adds natural carbon and builds soil fertility & microbial life
- ✓ Environmentally friendly, improves yields, enhances crop quality for sustainable growing
- ✓ Easy application granules
- ✓ Apply all seasons, all weather conditions, saves on water

NB: Soil analysis and crop requirement will determine which fertilizer should be used for optimum results.
