PHYTA - For use in Agriculture

A water soluble suspension containing Potassium Phosphite, Copper and Zinc. Phyta stimulates growth in a range of crops to maximise their resistance to a range of diseases including downy and powdery mildew, botrytis, phytophthora, pythium and also some bacterial diseases. Phyta is highly systemic and moves through both the phloem and xylem of the plant.

PRECAUTIONS: Wear protective clothing when preparing spray mixture. Wash with soap and water after use or accidental skin contact. Rinse empty container three times with a volume of water equal to a minimum of 10% of that of the container. Add the rinsings to the contents of the spray tank. Destroy empty container and dispose of in a safe way.

DIRECTIONS FOR USE:

COMPATIBILITY: Physical compatibility should first be checked by using the current proportions of products in a small jar test. Users should then test tank-mix combinations for phytotoxicity on a sample of crops prior to use. Read other labels carefully. Always add Phyta to spray tank first after initial pre-mixing with water. Always shake container before opening. Do not spray in temperatures above 30°C.

PHYTA CROP RECOMMENDATION:

CROP	TIMING	RATE	COMMENTS
Onions, leeks	3 – 4 leaf	2 – 4 ℓ / Ha 200 – 400 ml / 100ℓ	At 10 – 14 day intervals
Carrots, parsnips	2 – 3 weeks after emergence	2 – 4 ℓ / Ha 200 – 400 ml / 100ℓ	At 14 day intervals
Beans, peas	2 – 3 weeks after emergence	2 – 4 ℓ / Ha 200 – 400 ml / 100ℓ	At 14 day intervals
Lettuce	Start 7 – 10 days after planting	4 ℓ / Ha 400ml / 100 ℓ	Repeat twice
Brassicas	2 – 4 leaf stage	2 – 4 ℓ / Ha 200 – 400 ml / 100ℓ	At 10 – 14 day intervals
Strawberries	Green bud	4 ℓ / Ha 400ml / 100 ℓ	At 14 day intervals
Citrus		4 ℓ / Ha 400ml / 100 ℓ	Multiple applications as required
Grapes		4 ℓ / Ha 400ml / 100 ℓ	Multiple applications as required
Potatoes	From flowering through to tuberisation	4 ℓ / Ha 400ml / 100 ℓ	Three applications
Ornamentals and turf	From spring	400ml/100ℓ	Multiple applications as required
