

BIOGROW

At BIOGROW, we aim to provide all gardeners with effective, organic and biodegradable alternatives to traditional disease and pest control.

Our products are free from synthetic chemicals, thereby ensuring no contamination of soil, water, air or beneficial organisms.

Our products can be used both indoor and outdoor.

Organic Fungicide

For organic control or suppression of fungal plant diseases

Copper Soap is an ultra-low-load copper fungicide for disease control. Safeguard your plants with this unique fatty acid formula that ensures copper ions effectively eliminate fungal and bacterial spores. Spray preventatively for optimal results with no visible residue. Odourless and effective.

- CONTROLS BLACKSPOT, RUST, MOULD, MILDEW
- VEGETABLES, FLOWERS & HERBS
Effective and safe to use in organic gardens and greenhouses, on lawns, roses, fruits, berries, hanging planters, foliage, houseplants, ornamental trees and more.
- POLLINATOR, PEOPLE & PET FRIENDLY
Certified, made with organic biodegradable ingredients, bee, child and pet friendly when used as directed.
- INDOOR & OUTDOOR USE
Easy application once every 7-10 days. Can be applied in hand-held sprayers, spray trigger bottles, and a knapsack for larger areas.

Phyta boosts plant immunity, disease resistance and improves plant health. Packed with highly available phosphate, potassium, zinc and copper. Made from a liquid format bonded with organic acids for optimal adsorption. Phyta maximises resistance to disease including downy and powdery mildew, scab, botrytis, phytophthora and pythium.

Powerful, naturally occurring elements proven to prevent disease and unwanted pests and promote plant growth.

**CERTIFIED ORGANIC.
ZERO RESIDUE.**

Organic Insect Control

Prevents build-up of insects and mites

Bioneem, cold pressed from neem seeds (*Azadirachta indica*), shields plants from Aphids, Whitefly, Spider mite and many more insects. Regular use disrupts feeding and insect behaviour. **Bioneem** is gentle on beneficial insects and breaks down quickly.

Natural protection from all pest life stages

Neudosan is an organic insecticide designed to combat soft-bodied pests such as Spider mites and Aphids on fruits, vegetables and ornamental plants. Made from potassium salt of fatty acids, it acts swiftly and can be used up until harvest. **Neudosan** poses no risk to beneficial insects once dried.

The swift, knock-down solution for insect control

Pyrol is a liquid insecticide that targets Spider mites, Aphids, & Scale on a number of different plants. Made from Pyrethrum (extracted from chrysanthemum flowers).

Pyrol forms a powerful natural defence. It is insect-toxic, but animal friendly. Ingredients break down swiftly in sunlight and oxygen, ensuring no lasting environmental impact. Effectively disrupts pest life cycles, coating eggs and adults. Caution when applying near beneficial insects.

Organic Snail & Slug Control

Ferramol is a natural molluscicide that is pet, wildlife and human friendly. Scatter Ferramol near your plants, and let it attract and stop slugs and snails from feeding. Made from organically certified, biodegradable iron phosphate, Ferramol breaks down to form plant available phosphate and iron fertilisers. It is effective in rain & irrigation events, as it swells when wet and dehydrates to its original size when dry. It does not disintegrate after first contact with water. This provides dependable, long-lasting defence against snails and slugs, giving you peace of mind throughout the gardening season. Less is more.

Organic Weed Control

Finalsan is a non-selective contact herbicide, made from certified organic plant extracts. It swiftly dehydrates and withers weeds upon contact, targeting grasses, dandelions, blackjacks, broadleaf weeds, thistles, algae, and mosses. Suitable for paving and open ground. This organic herbicide is glyphosate free and won't affect pets, beneficial insects, and birds.

Just enough water

Integrate is an innovative water saving technology that reduces water requirements by 30-50%. It forms a lattice in the soil that holds water and limits leaching by moving water sideways in the root zone. It conserves water, boosts oxygen to roots and can be applied via irrigation. Ideal for pot plants, seedlings, excessive rain and drought conditions.

Comprehensive Instructions

Plant Nutrition

Biotrissol is a foliar feed supplying vital macro and micronutrients. Derived from sugar beet. It strengthens the plant, aiding flower development and can be used as a foliar feed or a drench. It combines well with other products.

SeaBrix is a nourishing blend of kelp, fish hydrolysate, amino acids and triacontanol providing extensive plant health and growth.

Packed with balanced nutrients, growth promoters and plant hormones, SeaBrix supports robust roots, efficient nutrient absorption, enhanced photosynthesis, and overall resilience.

- **PLANT HEALTH BOOSTER**
Supports plant nutrition and health for greener foliage, fuller blooms and larger growth. With essential nutrients and vitamins from root to shoot.
- **VEGETABLES, FLOWERS AND HERBS**
Effective and safe to use on vegetables, flowers, organic gardening, herb gardens, greenhouses, indoor house plants, lawns, roses, fruits, berries, hanging planters, foliage, houseplants, ornamental trees and more.
- **POLLINATOR, PEOPLE and PET FRIENDLY**
Certified, made with organic ingredients, bee, child and pet friendly when used as directed.
- **INDOOR & OUTDOOR USE**
Easy application once every 7-14 days. Can be applied in hand-held sprayers, spray trigger bottles, and a knapsack for larger areas.

About our products

What **BIOGROW** offers the organic gardener and grower:

- **KILLS AND REPELS INSECTS**
Effective knock-down of hard to kill insects, including Spider mites, Aphids, Whitefly, Mealybug, Leaf roller, Scale and damaging worms.
- **NO HARMFUL RESIDUE**
Our range of products are organically certified for use in organic gardening.
- **USE UP TO THE DAY OF HARVEST**
Formulated with effective organic, biodegradable ingredients, our products can be safely sprayed on herbs and vegetables up until the day of harvest.
- **MADE FOR PEOPLE, PETS & THE PLANET**
Used as directed, **BIOGROW** products are ideal for use on houseplants, vegetables, gardens, succulents, flowers, ornamentals and fruit.
- **FOR USE INDOOR, OUTDOOR AND IN GREENHOUSES**
Spray on vegetables, fruit trees, ornamentals, shrubs, flowers and gardens.
- **CAN BE USED AROUND PETS & CHILDREN**

All products are registered under Act 36 of 1947 with the Department of Agriculture, Land Reform and Rural Development (DALRRD) in South Africa.
